Dear sir or madam,

Application for a job Fitter – Brands # 6433

I am applying for the Fitter position in your advertisement at Trade me. I just came back from Germany and I am currently staying in Auckland Orakei. I have my New Zealand residence.

Maintenance Fitter advertisement caught my attention right away since it offers the challenges I am looking for. A top class company and a demanding task combined with an international exposure. As passionate team player I am used to work on multiple-tasks projects in an international environment and I would be fascinated to expand my knowledge.

I believe that the job position as Maintenance Fitter in your company does very much match my prior experience, skills and my desire to learn more. I have a profound knowledge of both theoretical concepts and practical applications. I learned my profession “from scratch”, starting as a Industrial Mechanic and made my way up to a State Qualified Engineer with an overall working experience of more 9 years. In addition, I have a sound experience in working with CAD and Microsoft Office applications in various technical engineering settings. I strongly believe that I could seriously contribute and add value to Fonterra Ltd. performance. I would be grateful if you gave me an interview opportunity to demonstrate my skills.

I am looking forward to hearing from you. Thank you for your time and consideration.

Yours sincerely,

Name / Signature
